

Building *Peace and Safety* in the Fraser River Salmon Fishery

- Improved communications
- Promote catch monitoring for today's river salmon fisheries
- Map and management advice on high use/conflict areas
- More boat launches, parking, and camping for all users
- Strategies to reduce crowding
- Foster safety and resolve disputes in the river fishery
- Advance stewardship and conservation in the fishery

River Peacemakers Action Plan
Catch monitoring and compliance standards in fishery
Conflict resolution
Crowding and access
Education
Safety
Stewardship

What to do when conflict erupts on the Fraser River fishery?

Most conflicts in the river salmon fishery are easily solved when people fish safely, care about the salmon and the environment, and observe common sense river manners.

However, when fishers in conflict need help, they can e-mail riverpeacemaker@gmail.com so that the situation can be investigated by our Conflict Resolution Committee, leading to peacemaking action.

riverpeacemaker@gmail.com

Matters of illegal fishing or criminal behaviour **should not** be reported to Peacemakers. Please report illegal activity directly to the RCMP or DFO Fisheries Officers.

Fraser River Peacemakers

The primary function of our Conflict Resolution Committee is for our designates from First Nations and Sport Fishing Organizations to work together in the event of a conflict to facilitate informed communications between leaders from both fisheries, leading to an individual or collective course of peacemaking action.

Solutions for tomorrow's fishery
